1. What project have you initiated or contributed to that was designed to encourage people to walk or bicycle more frequently instead of riding in a car? Was the project successful? Would you do anything differently if you did this project again?
2. What project have you initiated or helped with that taught people how to walk or bicycle more safely? Describe your specific contributions to the project. Who else helped with the project (parents, friends, classmates) and what were their roles? Describe where you found the information and give at least 3 examples of safety rules you shared with the participants.
3. Explain how you incorporated cycling or walking into your routine instead of riding in a car. What safety equipment do you use to insure that you are visible to cars?
